

Hire Nurse Practitioners Faster Without Sacrificing Quality

 **NPHIRE** is a purpose-built hiring platform for Nurse Practitioners that helps teams access qualified NP talent faster through deeper clinician data and intelligent matching.

NP Hiring Isn't a Volume Problem. It's a Precision Problem.

With nearly 2 million healthcare job openings each year, *leading hiring teams are moving away from "spray-and-pray" job boards that prioritize volume over fit.* Generic tools create noise, slow down hiring, and make it harder to identify truly qualified Nurse Practitioners in an increasingly competitive market.

NPHire was built to solve this challenge by focusing exclusively on Nurse Practitioner hiring.

How NPHire Works

Built Exclusively for Nurse Practitioners

Built by Nurse Practitioners and backed by 12+ months of research, NPHire is designed around how NPs work and how teams hire them, with every profile, filter, and workflow purpose-built for faster, higher-quality hiring.

Relevance-Based Matching & Screening

AI-powered matching and competency-based screening surface best-fit candidates faster, helping teams maintain quality without slowing the hiring process.

Designed for Hiring at Scale

NPHire works for single NP hires but is especially effective for teams with immediate or ongoing needs, including quickly hiring 5 or more Nurse Practitioners or managing consistent, high-volume NP hiring.

Why Teams Choose NPHire
